*Come join the fun, enlightenment,
and self-exploration*

During this workshop we will reveal:

Recent evidence for the following concepts and more:

The infinite mind The body's mind

How can you make use of these and aspects of the extended mind in everyday life?

How could this information impact inner growth opportunities?

The workshop will:

- Provide opportunity for two guided regressions (self-generated)
- Teach you how to manifest what you desire
- Teach you how to protect yourself from foreign energies
- Teach you how to see and interpret the symbols in your life
- Teach you about the ego construct and how to reach another life for talents and aspects you want to strengthen.

We shall not cease from exploration
And the end of all our exploring
Will be to arrive where we started
And know the place for the first time.
